## SUMMARY

Frontend Engineer with 4.5 years of experience in building scalable web applications using React, JavaScript, and TypeScript. Experienced in leading teams, defining system architecture, and collaborating with global clients to deliver high-quality products. Skilled in Agile/SCRUM, Kubernetes deployments, and integrating third-party solutions within enterprise systems.

## SKILLS

Javascript, ReactJS, NextJS, HTML, CSS

Azure CI/CD, GIT, VS Code, Urban Code Deploy

## EXPERIENCE

### Software Engineer II

**Metlife**                                                      September 2025 – Present,  Hyderabad, IN
- Lead and mentor a team of developers, providing technical guidance, code reviews, and ensuring adherence to engineering best practices and delivery timelines.
- Oversee system and UI design reviews across multiple teams, ensuring consistency, scalability, and compliance with architectural standards.
- Drive design governance, validating that all modules follow the approved architecture and align with long-term product strategy.
- Continuously improve team efficiency and quality by standardizing design patterns, enforcing documentation practices, and promoting a culture of technical excellence.

### Associate Consultant (On site Lead)

**Capgemini**                                                      July 2024 – August 2025,  Tokyo, JP
- Led a 10-member cross-functional team in delivering a full-scale insurance product, ensuring timely delivery and high code quality across modules.
- Collaborated directly with clients to gather, analyze, and refine business and technical requirements, aligning solutions with product goals.
- Designed and implemented system-level architecture to enhance scalability, performance, and maintainability across front-end and back-end components.
- Identified and integrated third-party tools and services, optimizing system capabilities and reducing development time.
- Acted as the primary technical liaison between onshore, offshore, and client teams—driving communication, mentoring engineers, and ensuring smooth project execution.

### Associate Consultant

**Capgemini**                                                      August 2023 – July 2024,  Hyderabad, IN
- To guide the NGT's in understanding the requirements.
- To give solutions on the provided architecture to meet the requirements.
- Ensuring the solutions provide efficiency and can be scalable.

### Senior Software Engineer

**Capgemini**                                                      January 2023 – August 2023,  Hyderabad, IN
- Analyzed user stories and translated business requirements into technical specifications and front-end features.
- Developed and maintained UI components using React and client-specific frameworks built on top of it, ensuring adherence to design and performance standards.
- Collaborated closely with business analysts, designers, and QA teams to deliver high-quality, user-focused features within sprint timelines.
- Contributed to knowledge sharing and documentation, helping onboard new developers to the client-specific framework.
- Adapted quickly to new technologies, demonstrating flexibility and strong problem-solving skills in dynamic project environments.

### Software Analyst

**Capgemini**                                                      April 2021 – January 2023,  Hyderabad, Telangana
- Analyzed, identified, and resolved software bugs across multiple modules, improving product stability and reducing recurring issues.
- Participated in deployment activities using UrbanCode Deploy and Mirantis Kubernetes Engine, ensuring smooth and timely releases.
- Collaborated with architects and business stakeholders during requirement discussions to clarify use cases and align on technical solutions.
- Actively contributed to Agile SCRUM ceremonies, providing technical inputs during sprint planning, daily stand-ups, and retrospectives.
- Supported development and QA teams in reproducing issues, validating fixes, and enhancing overall system reliability.

## EDUCATION

### B.Tech

VNR Vignana Jyothi Institute of Engineering and Technology · Hyderabad, Telangana · 04/2016 – 04/2020
